SUBMISSION

Sir:

Submitted herewith is a copy of art together with a form listing the same  
for the convenience of the Examiner.

The publication DE-A1-41 10 653 (Tsing) is a thermo electrical  
transformer, using a plurality in a row connected thermo element related pairs, by using a first (1)  
and a second (2), as films applied, conductive materials, applied onto a substrate (7). Said first  
(1) and said second (2) films are arranged to overlap each other (first and second material) as a  
connecting point (3) in a first plane (5) and (second and first material) as a connecting point (4)  
in a second plane (6). By this arrangement it is possible to measure the heat transfer, while the  
temperature gradient, in a direction perpendicular to the surface of the substrate (7) will generate  
a thermo-related voltage. This arrangement is adapted to measure flows, chemical substances or  
IR-radiation. The publication also discloses a method for producing such a thermo electric  
transformer.

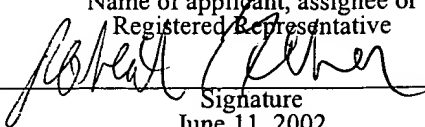

I respectfully request that the information submitted be considered and  
enclose our check number 09648 in payment of the required \$180.00 fee.

In the event the actual fee is greater than the payment submitted or is  
inadvertently not enclosed or if any additional fee due during the pendency of this application is  
not paid, the Patent and Trademark Office is authorized to charge the underpayment to Deposit  
Account No. 15-0700.
